Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art lacks a claimed method for determining a second parameter, expressed as "B(t)" in the specification. In the cited applied references, the parameter B(t) is given by uniform random numbers. In contrast, in the present invention, B(t) is acquired by the following method. The method comprises the steps of (1) preparing theoretical models of correlation functions of fluctuations, where each model includes candidates of B(t), (2) acquiring sampling data by sampling a local portion of real data, (3) generating a real correlation function based on the sampling data, and (4) selecting one of the theoretical models of step (1) that best matches the real correlation function generated in step (3), and determines B(t) from this model. This method indicates the fluctuation of the data by using the relationship established between a pair of a first parameter A(t) and a second parameter B(t). Therefore, if B(t) is given by uniform random numbers, as in the references applied by the Examiner, it would be impossible to indicate or determine the fluctuation of the data, as recited in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard C. Weisberger whose telephone number is 571 272 6783. The examiner can normally be reached on 6:30 AM to 10:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Kramer can be reached on 571 272 6783. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
